Oregon GEAR UP
STUDENT-LEVEL DATA REQUEST

In 2014, Oregon GEAR UP was awarded its third Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP) federal grant. Oregon GEAR UP has retained Metis Associates, a national consulting firm, to conduct a rigorous evaluation and assist with the data collection and reporting requirements.

Each year, Metis will collect and analyze student-level data from participating school districts. And, as required by the federal grant, Oregon GEAR UP will report these data (aggregated across participating school districts) to the US Department of Education in each year's Annual Performance Report (APR), as well as biennial and final reports. The following list shows the required data elements **for all GEAR UP students enrolled in GEAR UP Cohort schools in the 2019-20 school year**.

Data elements:
- First name
- Last name
- DOB
- Local student ID
- State-issued ID
- Grade level in 2019-20
- School name
- (If available) Homeless flag (Yes/No)
- (If available) Foster care flag (Yes/No)
- Taken PSAT in 2019-20 (Yes/No)
- Taken PLAN (practice ACT test) in 2019-20 (Yes/No)
- Taken ACT in 2019-20 (Yes/No)
- Taken SAT in 2019-20 (Yes/No)

In addition, we need to report **course enrollment and completion data**. To do so, we need the following information for each student and each course they took **in 2019-20**:
- Local student ID
- Course Name
- Course ID
- End-of-year course grade (numeric or letter grade) or credits earned → if a final grade is not available, you may provide semester or quarterly grades.

Please also upload a list of **course names for college-credit classes** at your school, along with the course number.

Please see the Excel templates at https://oregongearup.org/grant/apr.
